

TESTS AND EXPERIMENTS

- NEW IN/OUT PROCESS MACHINES OR MACHINES FOR COMPONENT CHARACTERISATION
- RETOOLING OF EXISTING MACHINES
- COMPLETE RETROFIT (MECHANICAL AND ELECTRICAL)

For tests and inspections that simulate normal conditions of component or finished product use.

Example: **Pantograph test bench and wheel fatigue test bench for high-speed trains**

Test bench managed by plc for the simulation of pantograph and railway wagon wheel stress on high-speed lines.
